Dec 2024 — Present

PROJECTS

Student Document Management System

Stack: PHP, HTML, MySQL

- Developed a web application for managing student documents.
- Utilized PHP for server-side scripting, HTML for the user interface, and MySQL for database management.
- Implemented secure student login using registration numbers.
- Enabled administrators to upload mark sheets and certificates.
- Provided students with easy access to download academic documents.
- Improved efficiency and organization of academic record management.

Banking System

Stack: Java, MySQL

Developed a Java-based banking system with MySQL database integration. The system allows users to register, log in, check their balance, deposit, and withdraw money securely. Implemented user authentication, transaction management, and database operations using JDBC.
